- MongoDB
- AI tooling (Claude Code)
- TypeScript
- HTML5
- RESTful APIs
- Git
- Testing
- Next.js
- Responsive Design
- Redux
- Docker
- Problem-Solving

Professional Experience

Fullstack developer, Flexpress Verwaltungs GmbH Hamburg, DE | 06/2026 – Present

- Improve and maintain the company website using Next.js, focusing on design enhancements and UX improvements.
- Build, test, and integrate REST APIs connecting frontend and backend services, using Bruno to validate endpoints during development.
- Write and maintain end-to-end test cases using Playwright to validate critical user flows and catch regressions before release.
- Participate in code reviews and apply established coding standards.

Web Developer (Freelance), Bau Hochberg Berlin, DE | 02/2026 – 04/2026

- Implemented and improved website layouts using WordPress with a focus on UI consistency and usability.
- Delivered responsive and visually consistent frontend pages aligned with client design requirements.
- Collaborated directly with the client on design decisions and pixel-accurate implementation.

Frontend Developer, IQVIA (MENA) Ramallah, WB | 10/2022 – 09/2025

- Contributed to user-facing applications in an Agile environment, building responsive and maintainable frontend features.
- Investigated complex system behavior across frontend, backend APIs, and integration layers.
- Improved system reliability by reducing production issues through structured debugging and root-cause analysis.
- Participated in production release cycles, ensuring operational readiness in live environments.

Frontend developer, Justprotect Nablus, WB | 04/2021 – 06/2022

- Developed and maintained production web applications in an Enterprise SaaS environment.
- Integrated backend APIs and contributed to improving application stability and release quality.
- Improved reusable frontend components using React.js and TypeScript, increasing code reusability by 20%.
